

Non Production Licence V5.lic .

Prasanth Kumar Reddy Eruva commented on February 24, 2017 [Permalink](#)

Hi..I am getting the below error while installing the "License for Blue Prism version 4: IBM - GTS Licence V4.lic"

ERROR = Operation failed - Verification failed - signature is not valid.

Please help on this

Hi, In my case the SQL Express did not allow me to have the .NET

Framework 4 - the installation took longer of what I did expect due to some minor errors while installing Blue Prism - everything is in the installation Guide - except the issue with the SQL Express and the .NET Framework - that is for us to resolve. In my case I used all the links here - for Blue Prism I did not have issues with the License -

just minor details that are in the guides. For the .NET I did review the requirement of the SQL and checked my impact.

As suggested in <https://www.microsoft.com/en-us/download/details.aspx?id=42299>, SQL Server Express 2014 requires

<<[...]

Step 1: Enable Microsoft .Net Framework 3.5 SP1 or download and install Microsoft .Net Framework 4.0.

Note: SQL Server Express (with database engine only) can work with either .NET 3.5 SP1 or .NET 4, there is no need to have both enabled.

>>

Probably if on your computer there is only the .NET Framework 4.5, the installation of SQL Server Express 2014 can fail... You can try to download and install the .NET Framework Runtime 4.0 (free from Microsf site) before to install SQL Server Express 2014...

Hi All,

I can't seem to get past the config of the Blue Prism Connection.

I have downloaded:

Microsoft .NET Framework 4.6.1

SQL Server Express 2014

BluePrism

I have left all options as default when installing SQL Server Express 2014.

I have opened BluePrism for the first time and am on the Sign In page.

My sign in page differs from the BluePrism instruction page in that in the "Connection" drop down mine says Default Connection as opposed to Financial Services (Primary) - I am not sure if this is an issue or not.

I clicked Configure button and entered the data (Connection Name, Connection Type, Database Server, Database Name) as per the instructions, however when I click Test Connection I get the error message:

"Database 'BluePrismTraining' does not exist"

Does anyone know how to get around this?

Thank you in advance!

Hi I have installed all softwares successfully , but not able to create connection in blueprism .. what could be the default credentials for SQL Server 2014 , please do needful .

Thanks,
Arun

Hello Team,

I am not seeing Create Database option in file menu, while creating Blue Prism Database. Please advise
